

## Natural Support For The Body's Immune System.

Allimax supports your body's immune system through natural allicin, a natural compound, extracted from fresh, raw garlic using a crushing, filtration and temperature controlled extraction process that dissolves pure allicin in water. Allimax uses only garlic sourced from Spain.

Allimax's sophisticated extraction process allows us to capture garlic's active component, allicin and deliver it directly to where your body needs it. Allimax capsules have a 36 month shelf life. Potency may diminish if kept longer.

Allimax can be used for a number of conditions with a anti-bacterial, anti-fungal and anti-viral properties. It has shown to treat a number of pathogens including SIBO, IBS, MRSA, Streptococcus aureus bacteria, assist in helping Lyme disease, common cold, flu, and a number of both viral and bacterial infections and we have studies to support this. Every batch is tested on drug resistant staph bacteria.

Years have been spent researching and developing Allimax to ensure it delivers maximum strength and maximum benefits. Allicin has shown to improve major health issues such as colds, flu, bacterial infections, viral infections, high blood pressure, cholesterol, and overall an improved immune response.

It also aids the immune system, circulation, digestion and provides detoxification and cleansing abilities.

Guaranteed 100% yield of pure stabilized allicin. Available in 30, 90 and 180 count vegetarian capsules, size "3". Capsules can be opened and powder mixed with food or drink if preferred.

**Ingredients:** 180mg concentrated natural allicin extracted from fresh garlic. Casing is Non-GMO maltodextrin. Free from artificial coloring, flavoring, salt, gluten and preservatives. Suitable for vegans and vegetarians.

- *Helps treat and stop the common cold, prevent and treat fungal, bacterial and viral infections, SIBO, IBS, Lyme disease, colds, influenza, general infections bladder infections, eczema, impetigo, parasites, sore throat, and much more.*

## ALLIMAX CAPSULES    How to get the best from Allimax capsules

Allimax capsules contain 180 mg of stabilized allicin powder - nature's anti-microbial agent. Allimax capsules can be used to help resolve any condition with a bacterial, fungal or viral cause.

### Your Stomach

An upset stomach that causes diarrhea and/or vomiting is usually caused by an E- Coli infection or sometimes Salmonella or Clostridium bacteria may be responsible. Allimax can kill these pathogens very easily. You will need to take a large dose at one time - for severe conditions up to 6 to 10 Allimax capsules per day in a single dose should be enough to resolve these conditions. This dose can be repeated 12 hours later if necessary and then it's recommended staying on a maintenance dose of 1 to 3 capsules per day.

### Your Circulatory System

Allimax capsules can also be used to help treat blood pressure and cholesterol levels. Take 3 capsules per day for a period of 3 months and review your levels. Reducing dosage after this is OK.

### Chest and Bronchial Infections

These can be difficult to resolve but as most of the infections are Staph or Strep bacteria these are very sensitive to Allimax treatment. Start with a course of 3 capsules per day - but if the infection is persistent then double this dose for a period of 1-2 months. Once the infection is resolved reduce back to a maintenance dose to prevent a re-infection.

### MRSA Infections

The Allimax formula has been shown to kill multi drug resistant bacteria including Staphylococcus aureus. Patients with open infected wounds will need to take Allimax capsules and use both the cream and liquid spray formulas. This combination will help to cleanse the wound and allow the healing process to accelerate. Some patients may have systemic MRSA infections (e.g. bladder, throat, stomach and prostate) and here the capsules will be sufficient in a dose of at least 3 per day for 1-3 months. **It is important to keep the patient on a maintenance dose after the infection has been cleared.**

### Allimax With Other Drugs

You can take Allimax with ANY other pharmaceutical drug including ASAs, Steroids, blood thinners like Coumadin and Clopidogrel. Allimax can often make your existing drug regimen work better as data suggests allicin is synergistic with many pharmaceutical agents especially antibiotics.
