

PROFESSIONAL STRENGTH

Allimed

Allimed Liquid with Dropper (1, 2, 4, and 8 ounce bottles)

Allimed contains 100% stabilized allicin from fresh garlic in a water base.

Allimed Liquid provides the body 100% yield of allicin from garlic sourced from Spain. A patented extraction process produces allicin and locks all its benefits into convenient, one-a-day capsules designed for rapid absorption into your body.

Allimed's sophisticated refinement allows us to capture garlic's active component, allicin and deliver it directly to where your body needs it.

Allimed Liquid can be used for a number of conditions with anti-bacterial, anti-fungal and anti-viral properties. It has shown to treat a number of pathogens including SIBO, IBS, MRSA, Streptococcus aureus bacteria, assist in helping Lyme disease, common cold, flu, and a number of both viral and bacterial infections.

Years have been spent researching and developing Allimed Liquid to ensure it delivers maximum strength and maximum benefits. Allicin has shown to improve major health issues such as colds, flu, bacterial infections, viral infections, high blood pressure, cholesterol, and overall an improved immune response.

It also aids the immune system, circulation, digestion and provides detoxification and cleansing abilities. Allimed Liquid can also be used for eyes, ears, and sinus irrigation.

Recommended for children or adults who do not or cannot take capsules.

Eight drops are the equivalent of one capsule.

Ingredients: Aqua, Allicin Liquid. Free of preservatives and additives.

Warnings: Discontinue use if irritaiton occurs.

How To Get The Most From Allimed Liquid

Allimed Liquid contains 100% stabilized allicin derived from garlic, nature's anti-microbial agent. This means that Allimed Liquid can be used to help resolve any condition that has a bacterial, fungal or viral cause.

Feet and Toe Nails

For a fungal nail infection or athlete's foot apply liquid twice daily to affected area. Allimed Liquid is easy to apply and should be carefully applied to each nail. Just two drops a day is needed to resolve these troublesome conditions.

Legs and Knees

Use Allimed Liquid on cuts, bruises, bites or stings which can become infected. Allimed Liquid may be applied as needed and when required. You can put on a bandage or dressing to apply easily. Allimed Liquid has been used successfully for treating open weeping MRSA infections. Once the liquid has started the healing process and new skin has appeared, it is effective to continue using Allimax Cream topically on the wound and stop using Allimed Liquid.

Trunk

Conditions such as eczema, psoriasis and rosacea may also benefit from using Allimed Liquid. It is estimated up to 95% of simple cases of eczema are infected by a bacterium called *Staphylococcus aureus*. Allimed Liquid has been shown to kill multi drug resistant bacteria including *Staphylococcus aureus*. Children who suffer from viral infections such as molluscum contagiosum can also benefit when using Allimed Liquid.

Hands and Finger Nails

Fungal infections are very common on finger nails, usually shown by tiny black or white spots which in time may get bigger and if not treated could lead to a split or cracked nail that can eventually be lost.

Allimed Liquid applied twice daily over the nail and cuticle surface along with 1 Allimed Capsule taken daily can normally resolve this within 12 weeks. It is imperative the protocol be followed throughout the entire new growth process of the nail. If this is not followed, results will be compromised and not be effective.

Face

Another viral infection that needs immediate treatment is a cold sore caused by herpes simplex virus. Using Allimed Liquid as soon as the lips begin to tingle will quickly prevent the cold sore from worsening and will soon resolve the problem. A mild stinging sensation indicates Allimed Liquid is working.
